claims and to be republished in the event of receipt of
amendments

For two-letter codes and other abbreviations, refer to the "Guid-
ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: ORIENTATION DEVICE FOR SURGICAL IMPLEMENT

(57) Abstract: Orientation device (2, 3, 17) for surgical use includes a frame (35, 15, 39) and a level device (6) attached to the frame. The feature may be oriented with a reference such as the Antero Superior Iliac Spine, (7) the acetabulum or the operating table to position the pelvis or the device. The level device is adapted to define a reference plane. The device thus allows precise orientation with respect to the pelvis through use of a reference plane.
